Education

2006-2012 Computer Science at University of Siena (Italy)

Employment history

- **Since July 2017 Web Developer at E-Play24 ltd**

Working in a fast growing up iGaming Italian company as web developer my main tasks are related to the maintaining and the improvement of our affiliates websites (skin) like for example betwin360.it

Since July I've developed:

all the web mobile websites;

Netent/Playtech/Pragmatic/Betsoft/WorldMatch games integration;

a CMS to allow our marketing managers to manage/create all the skins promotional websites using one unique system;

At the beginning in the IT department we were only 3, now we are 6 and me and the Team leader managing the tasks of the others devs.

- **Since January 2016 to July 2017 Freelance Web Developer**

- **Since September 2014 to July 2017 Web Developer at Digital Design**

I am working on the bitlanders.com social network.

We use angularJS for the Front End and PHP for the Back End.

We also use HTML5, CSS3, JS, jQuery.

Social connect development using the main social API like Facebook, Twitter, Tumblr, Google, Instagram and so on.

I have developed much administration pages like the admin for the shop and the integration of the Google Analytics data report.

As a team, we use SVN or GIT for the project sharing.

- **From October 2012 To September 2014 - Web Developer at Geographike s.r.l.**

Web map applications development with OpenLayers and Leaflet javascript libraries.

Web site development on PHP, HTML5 and CSS3;

Web Content Manager of web sites based on Drupal and Wordpress;

Facebook Web App;

Web Hosting Manager;

Web App development, jQuery Mobile and Titanium Framework, Android and iOS.

- **From July 2012 to October 2012 - Junior PHP Developer at Grossetositiweb**

Wordpress plugins development;

Wordpress custom template, plugins, custom content-type;

Web Content manager;

Apache Benchmark Test.
